

Campus Access Control Compliance

Rule: 6A-1.0018 School Safety & Monitoring

School / Site Name:

Date:

First Name of Person completing form

Last Name of Person completing form

Job Title:

Instruction on Completing Form:

Area: Select Gate or Door that remains open.

Building & Name: Enter Building Number and the name of the building, Example 5 Gym

Description of Safety Measure: The measure by which the area that is to remain unlocked is protected by another secured means.

Example: Perimeter or Exclusionary Fencing and/or Gates

(Cafeteria door 301 protected by exclusionary fencing and gates that prohibit access to the interior courtyard)

Image: Upload image of Door or Gate that is normally left open and an image of the security measure to a **Word document**. Both photos are required. Each photo must be labeled by number and "**picture exception**" or "**picture of security measure**". Please email this form and the image document to kimblerd@leonschools.net or ryalsj@leonschoolsnet. Example Entry Below.

Security Measure (Check all that apply)

- ☐ Exclusionary fencing
 ☐ Camera with access control
 ☐ Push Gate
 ☐ Secured door

Rule: 6A-1.0018 School Safety & Monitoring

By August 1, 2024, each school district and charter school governing board shall comply with the following school safety requirements:

a. All gates or other access points that restrict ingress to or egress from a school campus shall remain closed and locked when students are on campus. A gate or other campus access point may not be open or unlocked, regardless of whether it is during normal school hours, unless:

(I) Attended or actively staffed by a person when students are on campus;

(III) The school safety specialist, or his or her designee, has documented in the Florida Safe Schools Assessment Tool portal maintained by the Office of Safe Schools that the gate or other access point is not subject to this requirement based upon other safety measures at the school. The office may conduct a compliance visit pursuant to s. 1001.212(14) to review if such determination is appropriate.

b. All school classrooms and other instructional spaces must be locked to prevent ingress when occupied by students, except between class periods when students are moving between classrooms or other instructional spaces. If a classroom or other instructional space door must be left unlocked or open for any reason other than between class periods when students are moving between classrooms or other instructional spaces, the door must be actively staffed by a person standing or seated at the door.

c. All campus access doors, gates, and other access points that allow ingress to or egress from a school building shall remain closed and locked at all times to prevent ingress, unless a person is actively entering or exiting the door, gate, or other access point or the school safety specialist, or his or her designee, has documented in the Florida Safe Schools Assessment Tool portal maintained by the Office of Safe Schools that the open and unlocked door, gate, or other access point is not subject to this requirement based upon other safety measures at the school. The office may conduct a compliance visit pursuant to s. 1001.212(14) to review if such determination is appropriate. All campus access doors, gates, and other access points may be electronically or manually controlled by school personnel to allow access by authorized visitors, students, and school personnel.
