

My **moon** **book**

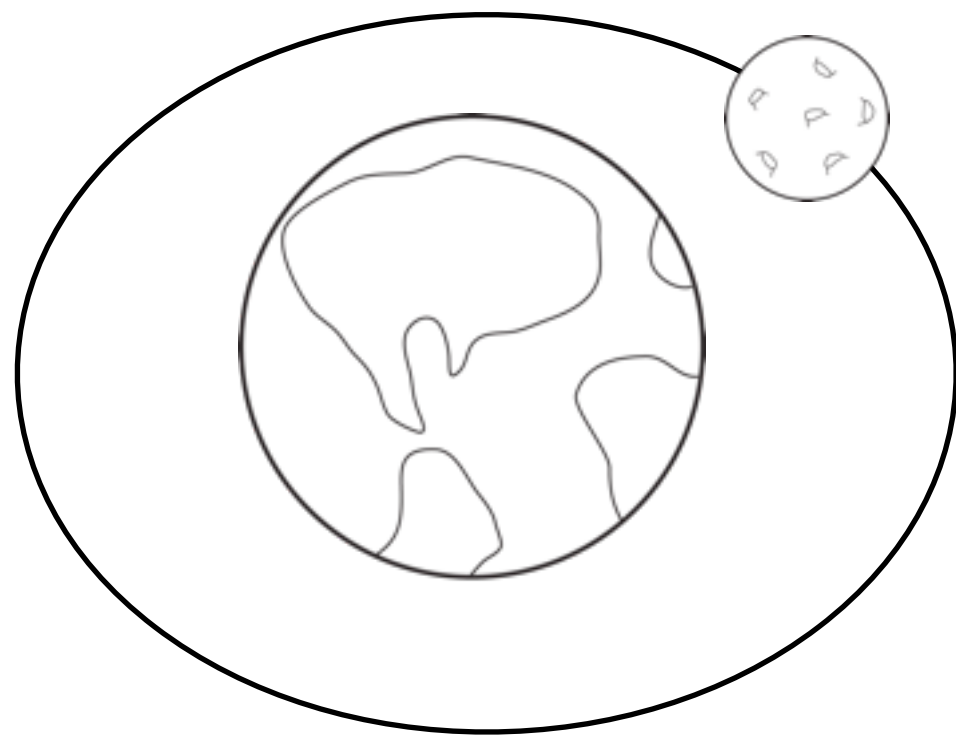

Name:

1

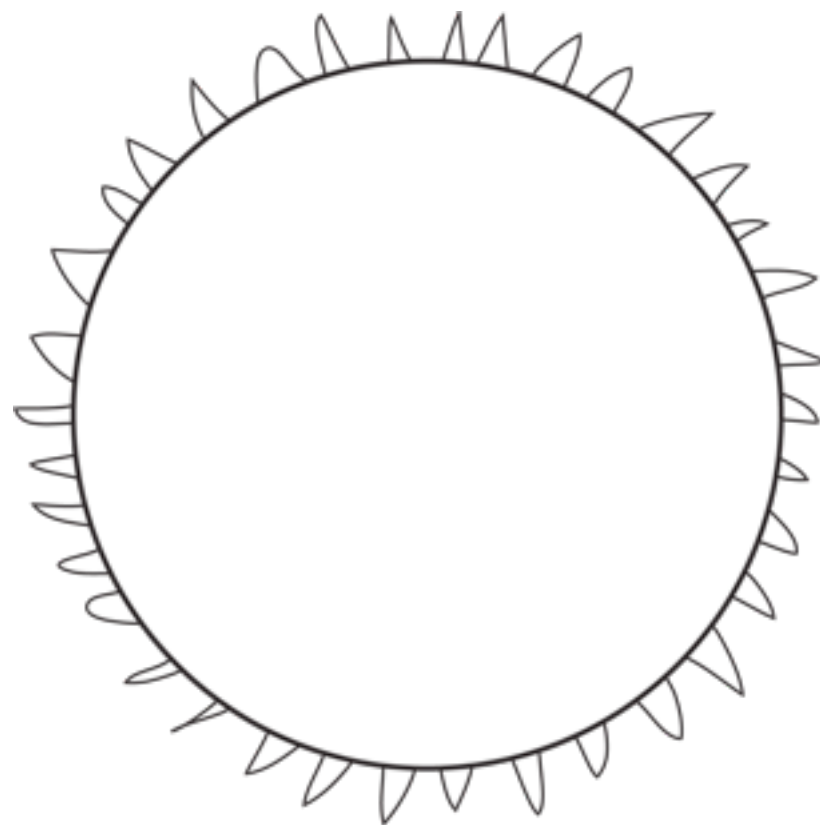

**The moon is the
only natural satellite
of Earth. It orbits
the Earth.**

2

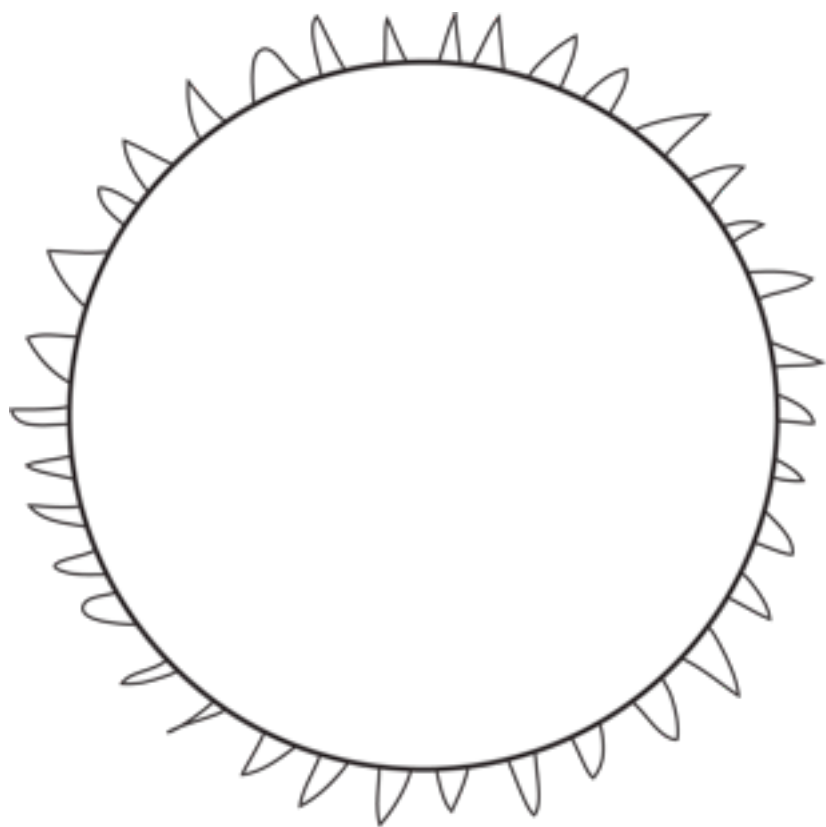

**Orbit means to go
around something.
The Earth orbits the
Sun.**

3

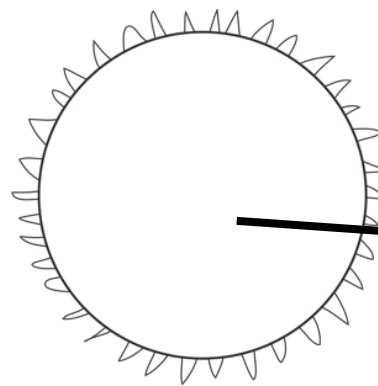

**The moon is not a
light source. It does
not make its own
light.**

4

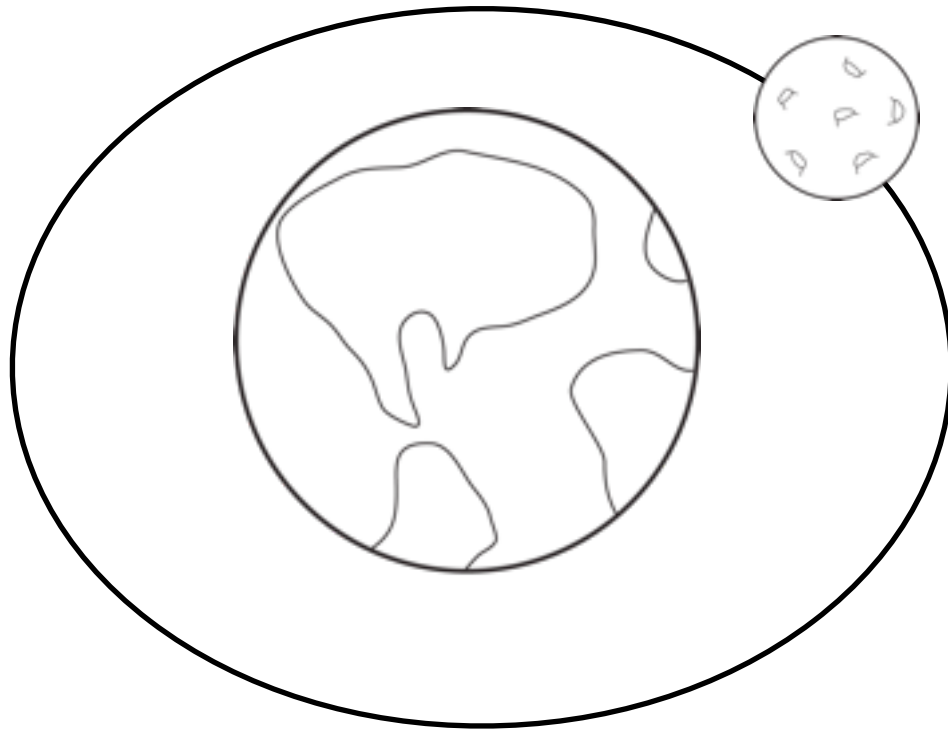

**The moon reflects
light from the sun.**

5

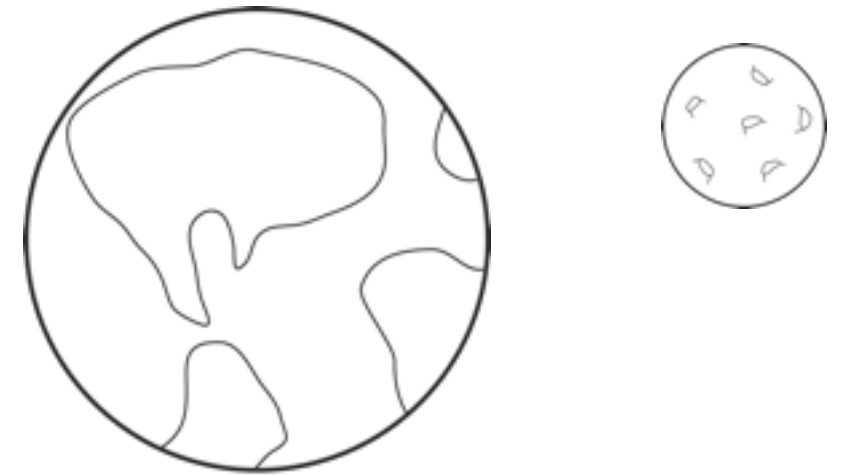

**We can see the
moon because light
from the sun
bounces off the
moon and to the
Earth.**

6

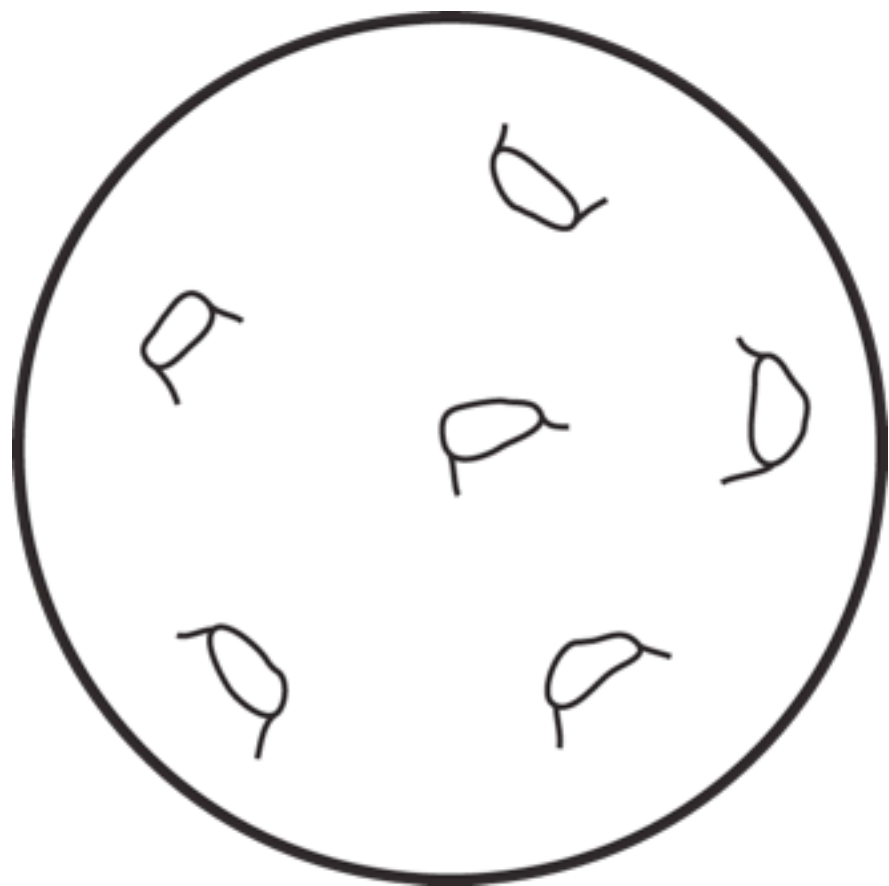

**It takes the moon
nearly 28 days to
orbit the Earth.**

7

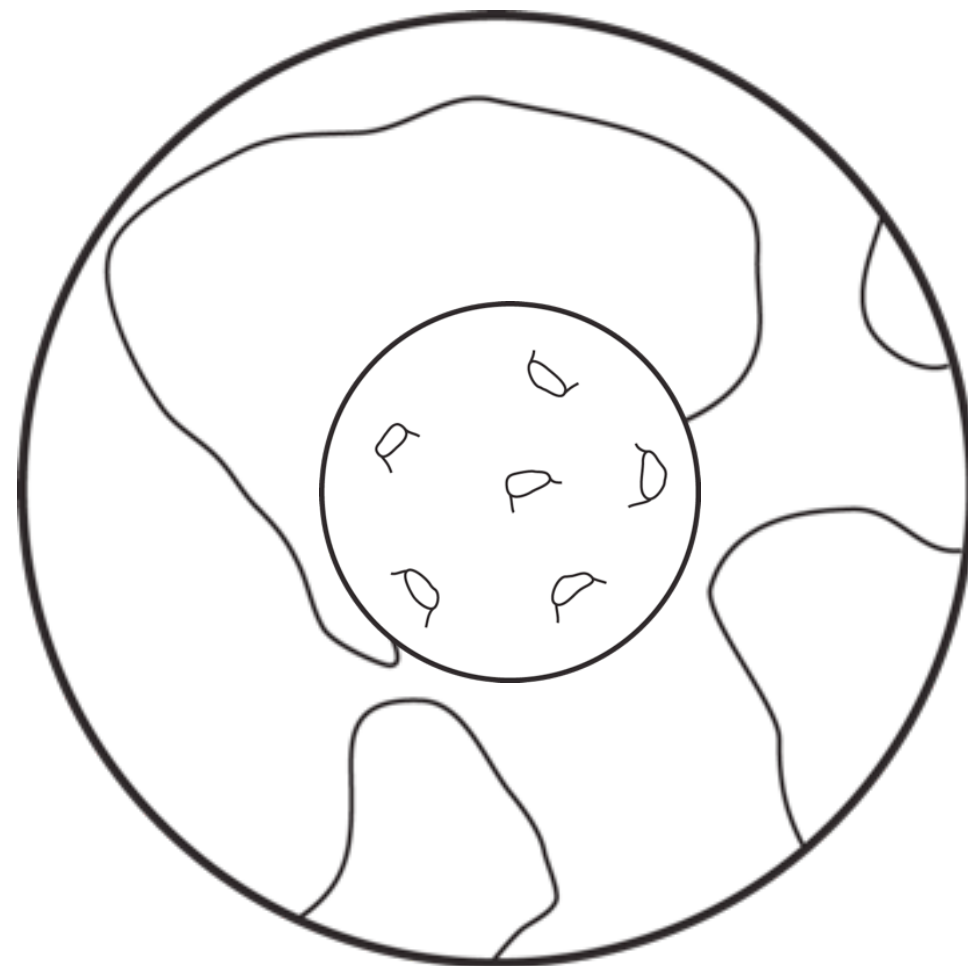

**The moon rises in
the East and sets in
the West.**

8

**The moon is a huge
rock with
mountains and
valleys.**

9

**The moon is 4 times
smaller than the
Earth.**

10

**We always see the
same side of the
moon. We never
get to see the
back side of the
moon!**

11

**The moon is really
fun to learn about!**
