Welcome to the 2023-2024 School Year!

Dear Parents,

My name is Mrs. Christie and your student is currently enrolled in one of my **Digital Design** classes. I am looking forward to this school year. It is my goal to provide all students with an educationally challenging, yet fun, experience in my classroom.

Digital Design is a fun and creative course. This "Computer Art" course series is focused on the graphic design process and technology applications with knowledge of the Elements and Principles of Design. Digital Photography creation and manipulation is included. Adobe Creative Suite; Photoshop, Illustrator, InDesign are taught from the beginner to the advanced levels. Certifications in all 3 software are offered in the advanced levels.

I have a webpage and use **CANVAS** to share my lessons. Students will have access to both. I have created several links for their course syllabus, a student survey and parent survey. My webpage, can be found on the **Chiles homepage** under **Departments** and then **Applied Technology**. Here you will see my name and the link for my Class Website. The **Parent Survey** is on my "Welcome" page and each class **syllabus** is located on your child's respective class page. Please read our **syllabus** and complete the online **Parent Survey**. All of these documents can be found in the student **CANVAS** tile.

I have high expectations of all my students. I am asking for your help to maintain those expectations by checking with your son/daughter periodically to make sure that his/her work   is being completed. Please do not hesitate to contact me at **christieca@leonschools.net** if you have any questions or concerns during the school year.

Thank you and I look forward to meeting you at Open House on September 18th!

Sincerely,

Cheryl Christie
